

PS-2201

Product Description:

PS-2201 is a polytetrafluoroethylene (PTFE) polypropylene laminated porous membrane designed to allow for good air transmission through the membrane while repelling water and contaminants.

Construction / Properties:

Property	Value	Test Method
Total Thickness	0.10 mm	QSP-726
Nominal Pore Size	0.9 μm	--
Air Permeability at 0.5" w.g.	0.80-1.2 cfm	--
Water Entry Pressure	>30 psi	--
Color	White	Visual

Features

- Good Converting Properties
- Excellent Breathability
- Waterproof

Specific tests should be performed by the end user to determine the product suitability for the particular application.
