

PS-2202

Product Description:

PS-2202 is a polytetrafluoroethylene (PTFE) polyester laminated porous membrane designed to allow for good air transmission through the membrane while repelling water and contaminants.

Construction / Properties:

| Property | Value | Test Method |
|-------------------------------|-------------------|-------------|
| Total Thickness | 0.13 mm | QSP-726 |
| Nominal Pore Size | 0.9 μm | -- |
| Air Permeability at 0.5" w.g. | 0.60-1.0 cfm | -- |
| Water Entry Pressure | >30 psi | -- |
| Color | White | Visual |

Features

- Good Converting Properties
- Excellent Breathability
- Waterproof

Specific tests should be performed by the end user to determine the product suitability for the particular application.
