

PS-2206

Product Description:

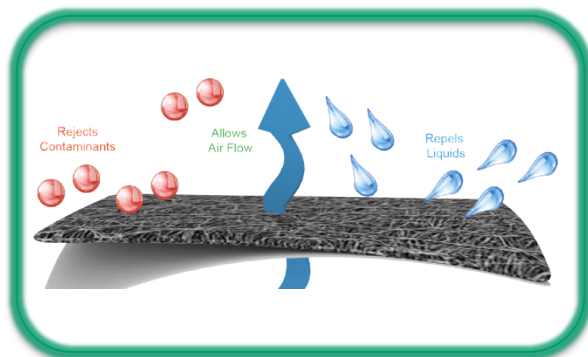

PS-2206 is a polytetrafluoroethylene (PTFE) porous membrane designed to allow for good air transmission through the membrane while repelling water and contaminants.

Construction / Properties:

Property	Value	Test Method
Total Thickness	0.02 mm	QSP-726
Nominal Pore Size	0.45 μm	--
Color	White	Visual

Features

- Good Converting Properties
- Excellent Breathability
- Waterproof

Specific tests should be performed by the end user to determine the product suitability for the particular application.
