

General Overview

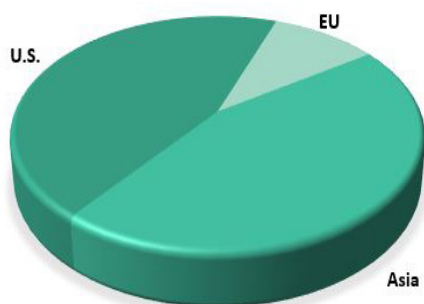

Polymer Science has been coating materials since 1998 serving the medical device and electronic industries worldwide. Polymer Science, Inc. added two locations, Suzhou Polymer Science and Polymer Science Europe, in 2012 and 2014 respectively to better serve our customers. We pride ourselves on high quality products, strong technical support and commitment to our customers. Our diverse team of engineers and technical staff, along with our state-of-the-art equipment, provide the capabilities necessary to develop a quality custom adhesive or coated material consistent with application requirements from anywhere in the world.

Global Overview

Polymer Science is a \$50 million technology and services company in the global medical and electronics industries.

We develop and manufacture roll stock material for medical, electronic and industrial applications.

Revenues by Geography

Globally we have

80 direct employees

Our team consists of engineers, coating specialists, sales and marketing professionals and administration.

Worldwide

We serve customers in over

25 countries worldwide

Products

Polymer Science offers the following range of products under its brands:

P-DERM®

- Silicone Gel Adhesives
- Hydrogels
- Acrylics
- Hydrocolloids
- Hydrophilic Coatings
- Urethanes

P-THERM®

- Gap Fillers
- Phase Change Material
- Heat Spreaders
- Electronic Control Interface Materials
- Tapes and Adhesives

P-SHIELD®

- Fabrics
- Foam Multi-laminates
- Foils
- Films
- Tapes and Adhesives
