

## PS-1227

### Product Description:

P-DERM® PS-1227 is a spunlaced polyester fabric which has been coated on one side with a medical grade, acrylic adhesive. The acrylic adhesive is designed for applications requiring long term wearability making it suitable for many wearable applications. The tape is supplied on a 54# siliconized paper liner.

### Construction / Properties:

Property	Value	Test Method
Total Thickness	0.2 mm	QSP-726
Material	Spunlaced Polyester	--
Adhesive	Acrylic	--
Adhesive Thickness	0.03 mm	QSP-726
Adhesion	>900 g/25mm	QSP-722
Polyken Probe Tack	170 g/in <sup>2</sup>	ASTM D2979
Continuous Use Conditions	50 – 80 F	WI-8.2-13

### Features

- Biocompatible
- Excellent Breathability (MVTR)
- Excellent Wear Time (>10 days)
- Excellent Tack
- Excellent Shear Strength
- Readily Contours to Irregular Shapes
- Hypoallergenic
- Excellent Converting Properties

Specific tests should be performed by the end user to determine the product suitability for the particular application.
