

PS-2189

Product Description:

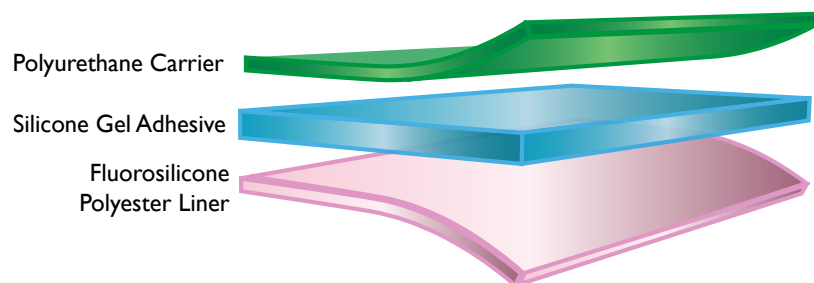

P-DERM® PS-2189 is a single coated, ultra high adhesion silicone gel adhesive tape coated onto a polyurethane carrier. The specially formulated gel formulation offers high tack in order to improve wear characteristics in applications where flexibility and modest resistance to shear may be desired while offering hydrophilic characteristics to enhance moisture management under the dressing. PS-2189 is supplied with a 50 micron fluorosilicone polyester liner.

Construction / Properties:

Property	Value	Test Method
